DETAILED ACTION

1. Applicant's preliminary amendment filed November 20, 2003 is acknowledged and entered. Claims 32-47 are pending and subject to the following restriction requirement.

Election/Restrictions

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 32, drawn to a device for measuring lymphocyte activation, classified in class 424, subclass 9.1.
 - II. Claims 33-47, drawn to a method for detecting activation of lymphocytes, classified in class 435, subclass 4.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the process can be practiced by another materially different apparatus, such as an incubator, a centrifuge, a detergent and a chromatography column.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, and therefor a serious burden, restriction for examination purposes as indicated is proper. Applicant is advised that the reply to

Art Unit: 1648

this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
